DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-9, drawn to a method of manufacturing a metallic filtration material, classified in class 427, subclass 248.1.
 - II. Claims 10-27, drawn to a filter unit, classified in class 210, subclass 483.

2. The inventions are distinct, each from the other because:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the process as claimed can be used to make other and materially different product such as a filter with a protective coating comprising material other than ceramic, silica, or metallic material or a filter with a support structure comprising material other than wire mesh.

Restriction for examination purposes is proper because these inventions are distinct for the reasons given above and also because (i) they have acquired a separate status in the art as shown by their different classification, (ii) the search required for the respective groups is not necessarily required by each of the other groups, and (iii) their subject matter is recognized as divergent.

3. A telephone call was made to Don Bulson on October 17, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 1723
